# WINDOWS FOR TOMORROW

**aluplast**® PVC-windows are a clever investment into the future. They possess outstanding quality characteristics you can count on. The system flexibility allows you to fulfil your individual needs and wishes perfectly. They already comply today with the necessities of tomorrow. **aluplast**® sets new standards with their high quality windows. **aluplast**® PVC-windows combine latest technology in window technique with highest living comfort.

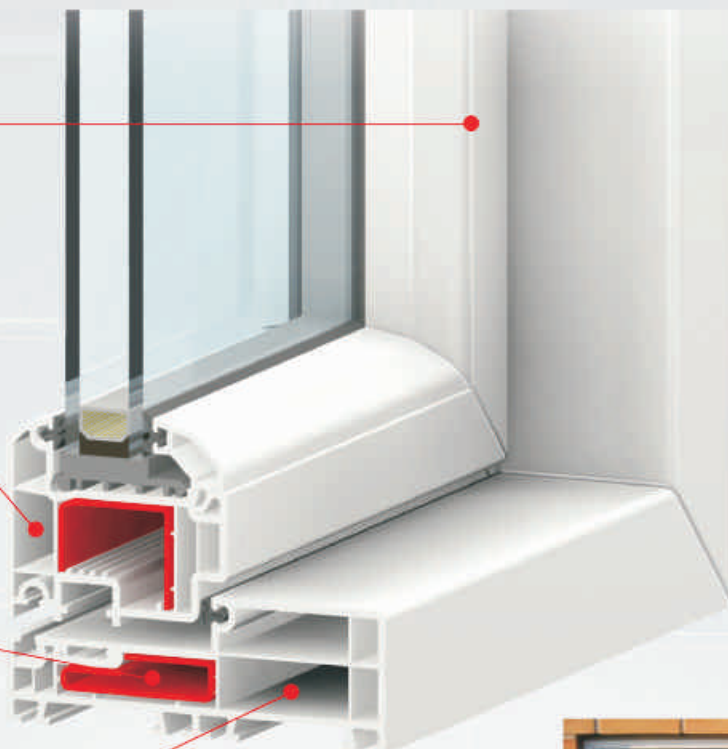

rounded edges for a  
harmonic sight

Multi Chambers provides  
for optimum heat  
insulation

large reinforced  
chambers for  
outstanding structural  
rigidity

5-chambers and 70 mm  
depth for optimal insulation

## MORE THAN JUST A CLEAR VIEW OUT

Windows should do more than just sparkle and ensure you enjoy a clear view out. For example, they should come up to the house-owner's high expectations. And should be able to exactly match your individual wishes. Just like **aluplast**®'s PVC window systems. Because **aluplast**® has set new standards in window construction. Ideal for all those who are simply not prepared to compromise either on technology or appearances.
